

Charge controller and inverter integrated

Export control (Zero export)

8 ms UPS-level Switching

Maximum charge and discharge up to 100A

IP65 dustproof and waterproof

Fanless design, long lifespan

^{*1:} The actual charge and discharge current also depends on the battery.

*2: Under off-grid mode, the battery capacity should be more than 100Ah.

*3: When there is no battery connected, inverter starts feeding in only if string voltage is higher than 200V.

*4: Can be reached only if PV and battery power are enough.

*5: CAN communication is configured by default. If 485 communication is used, please replace the corresponding communication line.

*6: CAN communication is configured by default. If 485 communication is used, please replace the corresponding communication line.
